You are encouraged to compose your comments in a text-only word processor (e.g., Notepad), review your text for errors, then cut and paste the final version into the appropriate text box below. Some formatting characters used in programs like Word (angled quotes, accents, special characters) will not display properly. Save your edits, review your final text, and make any edits necessary to correct the format.

A reference letter is often the most important part of the evaluation and lends credibility to the overall ratings given above. An evaluation without written comments offers little support for the applicant. Observations, which document your ratings of the candidate's personal and/or academic qualifications, as well as comments on specific strengths and weaknesses, are extremely helpful. On the free text field below, please add comments that you feel may assist the admissions committee in further considering this applicant for admission.

3000 character limit. Characters include spaces, carriage returns, numbers, letters, etc.

This section is for you to elaborate on any answers that you gave to some previous questions in the evaluation form and is not intended as a continuation of your reference letter.
