Introduction

- The membership of the Association of American Veterinary Medical Colleges is pleased to present the AAVMC Annual Data Report 2013-2014. This report includes data concerning veterinary school faculty, students and applicants and represents the most frequently requested data from the AAVMC.
- This report includes, but is not limited to, a collection of data compiled through an internal members-only survey conducted each fall. The 28 colleges and schools of veterinary medicine in the United States were surveyed. A final report is distributed exclusively to participating members of the AAVMC in December. The Annual Data Report features data on faculty and students from the 28 colleges and schools in the United States and selected international members.

Presence of Racially and Ethnically Underrepresented Students at US Colleges of Veterinary Medicine*

AAVMC Internal Reports
2013

Underrepresented in Veterinary Medicine (URVM) is defined as populations of individuals whose advancement in the veterinary medical profession has historically been disproportionately impacted by six specific aspects of diversity (gender, race, ethnicity, geographic, socioeconomic, and educational disadvantage) due to legal, cultural, or social climate impediments.

Students who are of Asian descent are considered underrepresented in the veterinary medical profession and are included in the calculations for this bar graph.

*This data set includes enrollment data from Ross University due to the high number of American students enrolled.

**This bar represents the US Total without Ross University.
