

What's the Story Behind Tuition?

Tuition Trends

Tuition has been on a steady rise for more than 30 years throughout higher education. Academic veterinary medicine is no different.

Public Support

In 1988, student tuition provided about 25% of a public college and university's revenue, while state and local government provided about 75%. Thirty years later, that ratio is about 50-50.**

What's causing the increases?

The biggest reason is reduced public support. Others include rising administrative costs for personnel, operations and compliance.

Additional Student Services

Rising Healthcare & Medical Education Costs

Increased Government Regulations

Updating, Maintaining Older Facilities & Investing in New Technology

Common Misconception!

In most cases, new buildings are not funded by tuition dollars.

Who Sets Tuition?

There are numerous methods for setting annual tuition costs at the colleges of veterinary medicine.

Legislatively Mandated

In some states, the legislature mandates tuition and fees at public colleges and universities.

Presidents & Trustees

University leaders set tuition pricing across the institution's various academic units.

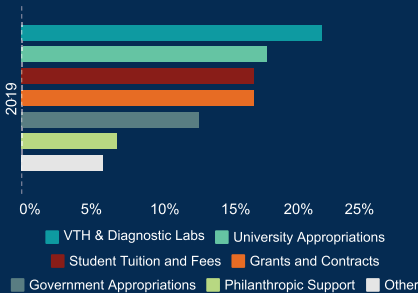

Collaboration

University leaders & veterinary college deans collaboratively determine tuition pricing for the academic year.

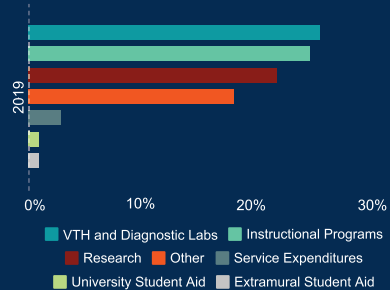

Where Does that Money Go?

Tuition is just one revenue stream that supports a college budget.

The Takeaway

Our colleges are very concerned about this problem and are seeking ways to make veterinary education more affordable. This includes strategies to address rising costs, increase scholarships, and shape public policy through advocacy efforts.
