

April 20, 2021

The Honorable Tammy Baldwin  
Chairwoman  
U.S. Senate Appropriations Subcommittee  
on Agriculture, Rural Development Food  
and Drug Administration and Related  
Agencies  
129 Dirksen Senate Office Building  
Washington, DC 20510

The Honorable Sanford Bishop  
Chairman  
U.S. House of Representatives  
Appropriations Subcommittee on  
Agriculture, Rural Development, Food and  
Drug Administration, and Related Agencies  
2362-A Rayburn House Office Building  
Washington, DC 20515

The Honorable John Hoeven  
Ranking Member  
U.S. Senate Appropriations Subcommittee  
on Agriculture, Rural Development Food  
and Drug Administration and Related  
Agencies  
190 Dirksen Senate Office Building  
Washington, DC 20510

The Honorable Jeff Fortenberry  
Ranking Member  
U.S. House of Representatives  
Appropriations Subcommittee on  
Agriculture, Rural Development, Food and  
Drug Administration, and Related Agencies  
1016 Longworth House Office Building  
Washington, DC 20515

Dear Chairwoman Baldwin, Chairman Bishop, Ranking Member Merkley, and Ranking Member Fortenberry:

We, the undersigned organizations, are writing to request your support for **\$10 million** in appropriations for Section 1433 Continuing Animal Health and Disease, Food Security, and Stewardship Research, Education and Extension Programs in the fiscal year 2022 Agriculture Appropriations bill. This program was reauthorized in the 2018 Farm Bill and has broad support across animal agriculture. These funds would enable competitive research grants to address critical priorities in food security, one health and stewardship.

Unfortunately, current funding by the United States Department of Agriculture (USDA) to support the animal sciences is not proportionate with the economic contributions of animal agriculture and has remained stagnant for many years. This disturbing trend was highlighted by National Academy of Sciences in its report "Critical Role of Animal Science Research in Food Security and Sustainability". The report recognizes the historic underfunding of animal sciences and calls for increased investments.

The imbalance in support for animal science puts U.S. animal agriculture at a major disadvantage at a critical time when livestock and poultry producers are striving for global competitiveness, improving sustainability and working to feed a growing global population. Recent disease outbreaks, including the coronavirus pandemic and avian influenza underscore the need to develop science-based tools to prevent and mitigate the impacts of zoonotic diseases. A proactive research effort is needed to help address these threats.

Demand for food is expected to increase from 70 to 100 percent by 2050 and animal agriculture must be a major contributor to meet these needs. Meat consumption is estimated to increase by 73 percent,

dairy consumption is estimated to increase 57 percent, and per capita egg consumption in developing countries is expected to rise by almost 40 percent.

As the world's population grows and natural resources become limited, animal agriculture research is necessary now more than ever to improve efficiency in order to continue providing safe and abundant food supplies for the growing global community. It is imperative that the increased food production be done in a manner that will protect our natural resources while maintaining America's global competitiveness in producing animals and animal products.

Advancements in animal science will play an important role in the future success of animal agriculture and the rural economy. Livestock and poultry sales account for 40 percent of all farm income. When feed crops consumed by livestock are included, the contribution to farm income is 60 percent. The United States must step up its investments in agriculture research to maintain its status as a leading producer of safe, affordable and abundant food and meet increasing demands.

The competitive grants program in Section 1433 provides a mechanism to focus resources on high priority areas to help animal agriculture meet future challenges. We respectfully request that **\$10 million** be appropriated for Section 1433 in fiscal year 2022. Please let us know if you have any questions or if we can be of any assistance as the FY 2022 appropriations process moves forward.

Sincerely,
